Senior UX Designer with **5+ years** designing complex B2B platforms for Fortune 500 clients across **Banking, Wealth Management, Health Sciences and Telecom** — translating operational friction into measurable business outcomes. Expert in end-to-end product design, design systems, and stakeholder alignment at the executive level.

EXPERIENCE

Incedo Inc. | **US Bank — Platform Modernization & Client Acquisition** Aug 2021 – Present

Led end-to-end redesign of banker-facing digital platform, enabling seamless digital information sharing and eliminating dependence on printed assets.

- **20% uplift** in application rates through simplified banker and customer workflows, reducing friction across the acquisition funnel.
- **30% reduction** in drop-offs by introducing personalized recommendation tools and decision-support features into the platform.
- **300% channel expansion** — migrated content delivery from print flyers to Email, QR, and SMS, dramatically increasing reach.
- Architected a **multi-BU white-labeled design system** in Figma, enabling consistent brand delivery across business units and external client deployments.

Incedo Inc. | **Verizon — Unified Change Management Platform**

Rearchitected a functionally stable but usability-challenged platform consolidating wireless, wireline, and fiber change management under one roof.

- Led **discovery across 19 user interviews and 150+ open survey responses**, plus Slack support channel analysis to surface systemic pain points.
- Facilitated **Design Thinking workshop** with core stakeholders to align on platform vision before a single pixel was designed.
- **40% increase in CSAT score** during usability testing following top-to-bottom platform redesign shipped alongside agile engineering teams.

Incedo Inc. | **LPL Financial — Advisor Onboarding Platform**

Redesigned a prospect onboarding experience for one of the largest independent broker-dealers in the US, directly targeting NPS and time-to-value metrics.

- **50% reduction** in time for prospects to complete onboarding journey (baseline: 1,000+ hours).
- Designed for **8–24 pt NPS improvement** target, from a baseline of 31, benchmarked against top competitor platforms.
- Conducted user research, journey mapping, and iterative prototype testing to validate design decisions with real advisors.

Incedo Inc. | **Citi — Digital Signer Management**

Contributed to the design of Citi's award-winning Digital Signer Management platform, converting analog signatory processes into a streamlined digital experience.

- Platform recognized with **GTB Innovation Award — Excellence in Digital Innovation (Overall) & Outstanding Account Opening and Onboarding Initiative**.
- Conducted user interviews, created journey maps, and designed core flows enabling clients to update signing authorities across multiple locations in a single step.
- Delivered jurisdiction-specific checklist designs and real-time Signer Summary Report views, improving transparency and operational control.

SKILLS & TOOLS

Design Design Systems, Design Thinking, Wireframing, Prototyping, IA, Interaction Design **Research** User Interviews, Usability Testing, Journey Mapping, Heuristic Evaluation

Strategy Stakeholder Alignment, Roadmapping, Service Blueprints, Accessibility (WCAG) **Tools** Figma, Miro, Jira, Balsamiq, Sketch, Illustrator, Webflow, HTML/CSS
